REPORT OF THE DEPUTY MINISTER.

The Honourable GEORGE E. FOSTER, B.A., D.C.L., LL.D., M.P.,
MINISTER OF TRADE AND COMMERCE, OTTAWA.

SIR,—I have the honour to submit herewith the Twenty-first Annual Report of the Department of Trade and Commerce, being the Report of the fiscal year ended March 31, 1913.

CONTINUED TRADE EXPANSION.

In my last annual report the opinion was expressed that the volume of Canada's trade would surpass all previous years, and it is now possible to state that the prediction was not only borne out by subsequent returns, but for the first time in Canada's history the value of the total trade passed beyond the billion dollar mark. It could not be expected, however, that such increases should continue indefinitely without interruption. For some time storm signals have been displayed by those directing the world's financial resources, and frequent words of caution and conservatism have been uttered.

It is but natural therefore that a temporary slowing down in trade should ensue, yet, in Canada, the future can be looked forward to, not only with confidence, but with the certainty that in due time the Dominion's trade will be marked by the same buoyancy as that which has been exhibited for so many years in the past. Caution, however, should be observed in all commercial and financial undertakings in order that such activities may be limited to actual needs and necessities.

The halt in the financial world has of course been primarily responsible for the stay in the continued rapid expansion of commerce. This, however, has not been limited to Canada. These conditions are present throughout the whole world, and in some countries the results have been of severe proportions. In fact the comparison gives cause for congratulation in Canada inasmuch as this was perhaps the last country to feel the financial strain, and no very great stress has resulted in the Dominion by reason of the confidence in which Canada is held in financial quarters in Europe.

On page x will be found a statement showing the percentage of increase of the trade of the principal countries of the world during the decade 1902 to 1912, from which it will be noted that the Argentine Republic heads the list with an increase of 206·24 per cent, while Canada comes second with 132·36 per cent.

The usual unrevised figures of the imports, exports and total trade of Canada for the months, eleven months and twelve months ended February, 1912, 1913 and 1914 will be found on page xi from which it will be observed that the total trade for the twelve months ended February, 1914, exceeds that for the previous year by \$76,276,202, clearly indicating that the figures for the fiscal year 1914 will eclipse those of any previous years.

MARKED DEVELOPMENT PROCEEDING.

Marked development is proceeding throughout the Dominion at present, including large public works, and railway and elevator constructions, which, though not yet productive, will continue to furnish considerable employment for labour during the time the large sums necessary to carry them to completion are being expended.

The conditions in Europe, to which Canada must look for money to carry on the vast developments of future years, have not been conducive to extensive credits nor low rates of interest since the commencement of the Balkan war and other political and social disturbances in the United Kingdom and Europe.

EFFECT OF THE UNITED STATES TARIFF.

On account of the large recent reductions in the United States tariff, and especially upon meat and dairy products, new conditions have arisen which have temporarily affected the Canadian markets for these commodities. In order to supply the shortage in the United States the nearby Canadian sources of supply have been suddenly and largely drawn upon, with the result that prices have been enhanced to both producers and consumers of these articles in Canada, and in the case of cattle with no little menace to the future sources of supply, occasioned by the possible over-sale of producing stock. It will be a matter of much regret and great economic loss if such over-sale assumes large proportions, a possibility which should be very carefully considered by both farmers and dealers in meat products.

On the other hand, the high price of food stuffs may be reasonably expected to encourage increased production, give a decided impetus to mixed farming in the West, and in time bring about a better equilibrium between supply and demand.

WESTERN GRAIN CROP.

The very large grain crop in the West during the past season has resulted in more than ordinary satisfaction, coming as it does at a time when financial and commercial activities were being somewhat restricted. Not only have all records of production been surpassed but, at the same time, few if any crops ever produced in the West have been of such a uniform high grade. Added to this, the weather conditions have been such as to enable the crop to be marketed or stored in the elevators earlier than usual. Few complaints have been received respecting the distribution of cars, and the elevator capacity has also been materially increased.

The new Government elevator at Port Arthur has been pronounced to be the finest grain elevator on the continent, and, in view of the expected continued increase in the production of grain, it is presumed that the new Government elevators at Moosejaw and Saskatoon, now in course of construction, will be an additional source of satisfaction to the West.

SESSIONAL PAPER No. 10

WEST INDIES TRADE AGREEMENT.

From the figures now available, there is ample evidence that the agreement concluded between Canada and certain of the British West Indies will be of great mutual benefit. It is also confidently expected that these figures will be considerably enhanced by the recent establishment of the improved steamship service between Canada and those sister colonies.

I have the honour to be, sir,

Your obedient servant,

F. C. T. O'HARA,
Deputy Minister.
